WELCOME TO ECOTHERM

Quality uPVC Windows, Doors and Conservatories throughout Derby, Stoke on Trent, Nottingham and Leicester

Ecotherm, with **over 35 years of experience** installing quality uPVC Windows, doors and conservatories throughout Derby, Stoke on Trent, Leicester and Nottingham with many customers raving about the customer service experience, Ecotherm is a company that cares.

We care about the **quality** of our products, our **workmanship**, our **installation** and, foremost, our **customers** — sustaining a **well-earned reputation** by offering the highest levels of service year after year.

We believe in getting to know our customers' requirements and **tailoring those requirements** to a range of bespoke solutions, from upvc windows, doors, porches, conservatories and fascia, soffits & guttering.

We have introduced a great range of **money saving home improvement solutions** such as self cleaning wall coating and roof coatings that look like new for many years.

We understand that home improvements represent a major investment and can be stressful, our goal is to **get you what you want, how you want it and when you want it all at a fair price with the minimum of hassle.**

Why choose us?

We believe that the customer is always right and we tailor our products to match your exact requirements.

Whatever your requirements, property type and budget, our dedicated team will work with you from step one to make your ideas become a reality.

This begins with an on site survey.

How do I arrange a survey?

Click on the “**Click here to request a quote**” button at the end of the brochure to request a survey or callback so we can discuss your requirements in further detail.

Once we have all the information we need on your project we will send you a **no-obligation electronic quote** which you will receive as an email from our quoting programme “WinQuote”.

You can easily accept this quote, reject it, or direct message us to ask us any questions about it.

Things to consider when buying Windows, Doors and Conservatories

Do you need planning permission?

When installing a conservatory, planning permission isn't usually required. You're only likely to need planning permission if your conservatory will cover more than **half the area surrounding your house**, or if the conservatory roof is higher than the highest point of your existing property.

You must also obtain planning permission before you build on raised platforms such as **verandas and balconies**.

Energy Ratings

The Window Energy Rating system tells you how energy efficient a window is. Windows are given an energy rating on a scale of G to A+, with **A+ windows being the most energy-efficient**.

If saving money on energy bills is important to you and you want a warmer home then it goes without saying that you should try and buy the most energy efficient windows you can afford.

Reputation

As always, buy from a reputable business. There are lots of great companies out there but others that are less reputable.

Don't be afraid to **check out our reviews** online and in our app account to see what our past customers have to say about us.

Use Certass registered glaziers

CERTASS

It's a good idea to choose a double glazing installer that is registered with a competent person scheme, such as **Certass**. Membership means that companies can self-certify their work complies with building regulations. It also means the work is covered by an insurance-backed guarantee if it's not compliant and the company goes bust.

In England and Wales, new and replacement windows must meet a certain level of energy efficiency. You need to get a certificate to show your windows comply with these regulations. An installer registered with one of the self-certification schemes will issue this certificate for you - otherwise your council will need to come and check the work.
